ABOUT OUR COVER Photo by Gene R. Johnson of Gene's Photos in Salina, KS 67401 Phone 785-825-4760. The photo is of the Hale-Bopp Comet and was taken in Ellsworth County, Kansas late March of 1997. The photo was taken just after sunset, so the comet does not appear as large as when taken in total darkness. The camera captured the light from the sunset, thus the lovely colors. We have read estimates of 2400 to 3600 years before the Hale-Bopp Comet returns. This makes the photo really special and unique to 1997 and the century.

*Over 35 Years of Serving the Pump and Drilling Industry
Featuring Knowledgeable Sales People & a Large Denver Inventory*
