## LAKOS SAND MASTER and SAND MASTER PLUS Accessories

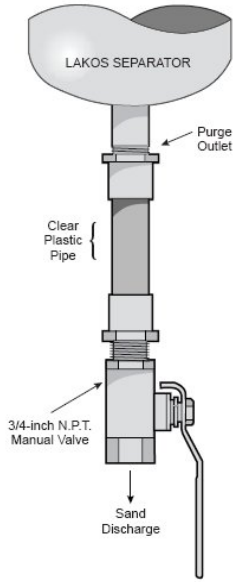

### Purge Valve Features:

**Visual Purge Kit VP-07-HKV** is a manual valve with see through extension for knowing when to purge. Includes a durable manual valve and a length of clear plastic pipe with proper fittings for installing directly onto the purge connection of a Lakos Sand Separator.

**Daily Auto Purge System DP-75-SMV** is an automatic purge valve for maintenance free operation. A reliable, fully automatic motorized ball valve designed to purge separated sand, silt and grit from Lakos sand separators. Collection chamber is flushed clean automatically at pre-selected intervals from 30 minutes to 32 hours. Bronze valve body with stainless steel ball. Purge duration may be set between 10 and 20 seconds.

**Auto Purge ASM-70-PDV** is an easy, economical, automatic purge solution for residential water well systems. Full port, straight through flow path and simple controller with daily purging options. Set to purge for 20 second intervals once, twice or three times a day. Made of 3/4" PVC plastic only. Uses two 9V batteries.

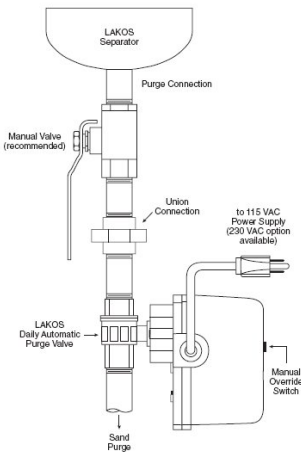

**Mounting Bracket Kits feature** Proper and professional support for LAKOS separators. Kit includes both machine and lag bolts for desired installation. Durable steel construction. 2 Brackets per kit.

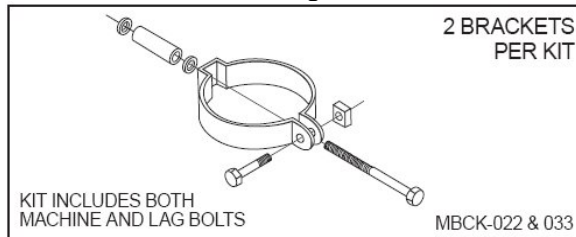

VP-07-HKV
